

# OpenGov Intelligence™

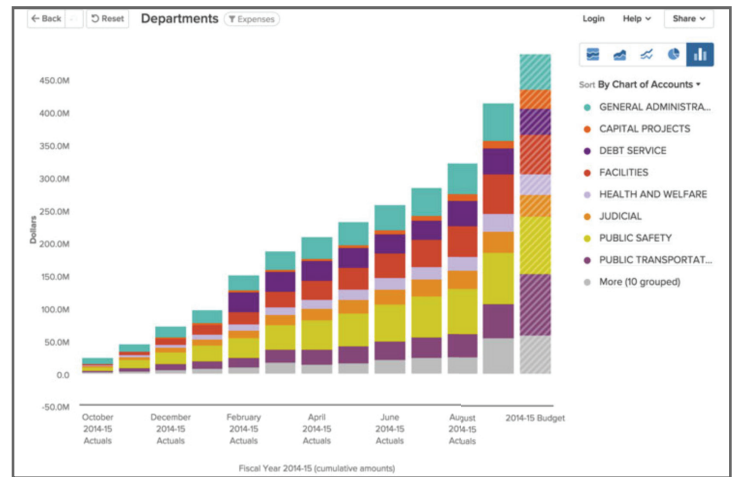

Management reporting and analytics  
for the 21st century government

OpenGov Intelligence™ is an easy-to-use reporting and analytics platform that allows your entire organization to rapidly make better, data-driven decisions.

## Free Your Data & Empower Your Agency

Typically only a few people are trained to run reports and data is scattered across disparate systems and agencies. These silos reduce your organization's ability to quickly act on financial and performance insights. Use OpenGov Intelligence to:

- **Centralize your data:** Unite your financial and performance data in one accessible platform.
- **Reduce interruptions:** Enable any employee to run reports using a trusted data source.
- **Eliminate backlogs:** Empower more people to access information and reduce administrative delays.
- **Deliver the details:** Allow non-financial personnel to dive into the data without having to re-query your financial and ERP systems.

Track monthly expenses like Montgomery County, TX.

Analyze decades of financing like the State Treasurer of California.

## Bring Your Data to Life

Most legacy financial systems make you start from the top, then drill down. With OpenGov, start at any level of your Chart of Accounts. Pull data from financial and performance systems, as well as plain old spreadsheets, to obtain new insights. Run mission-critical reports with ease.

## Securely share insights and data

Sharing should be simple. But with most financial systems (and spreadsheets) it is not. With OpenGov Intelligence, you can remove information silos and make sure everyone has current information. Powerful access controls let you decide who sees your reports and how deep viewers can dive into your data.

## Tell your entire story

Create powerful narratives by combining charts and annotations to convey both financial and non-financial data to your teams and keep everyone on the same page and speaking a common language.

## Publish when ready

Determine which reports and data are available across your organization with permissioning and controlled sharing. Your data is securely stored in the cloud.

“ *This ease of use enabled OpenGov to become Allegheny County’s base of reporting and its official record. It’s our one-stop shop for an honest measure of the truth.*”

-Tony Cholewinski  
Assistant to the Deputy Controller of  
Management Systems  
County of Allegheny, PA

## Unlock Insights & Increase Productivity

- Seamlessly unite financial and performance data
- Securely share reports with key stakeholders
- Rapidly view and analyze current data
