

STAFF REPORT

DATE: April 10, 2018

ITEM #: 4

TO: City Council

FROM: Public Safety Committee

AGENDA ITEM: Motion from Public Safety Committee to have discussion with Council

regarding the purchase of Rescue/Engine.

REVIEWED BY: Greg Malmquist, Fire Chief

BACKGROUND: At the March 27, 2018 Public Safety Committee meeting, Chief Malmquist presented the specifications and pricing for the Rescue/Engine in the 2018 CIP.

Specifications for this truck were developed by the Lake Elmo FD Truck Committee, comprised of FF/Engineer Brian Johnson, FF/Engineer Rich Springborn, FF/Engineer Chris Klein, Lt. Larry Cornell, Captain/Engineer Noah Malmquist and Chief Malmquist. The committee has been meeting since July of 2017. During this time they have also visited several other FD's with similar vehicles, to look at the trucks and discuss with those that designed and use them regarding do's and don'ts. Committee has come away with some very good ideas. Some general specifications were put together, followed up by several meetings with a vehicle vendor to determine what was feasible and what was not. After much back and forth determining "wants and needs" followed by multiple revisions the Truck Committee has what they feel are a good set of specifications. From the begining the committee identified goals and objectives for this vehicle:

- Design a vehicle to allow efficient delivery of our current level of service, now and into the future
- Gather all of our rescue equipment onto one vehicle for efficiency.
- Keep in mind that most responses will be with a 2 person crew, for ergonomics and efficiencies.
- Combine 2 vehicles to reduce vehicle purchase and maintenance costs.

The Truck Committee feels they have met these goals and objectives with the design and specifications of this vehicle.

Also, through the process, the Truck Committee identified equipment to be purchased based on the following:

- Equipment has been removed from service because it exceeded it's recommended life, (Air bags)
- Current, 25 yr. old hydraulic tools are obsolete and under powered to meet the demands of present day extrications.
- Replacement of homemade, unsafe cribbing with newer, safer, more efficient cribbing.
- Addition of stabilizing jacks that we haven't had proper space for in the past.

ISSUE BEFORE COUNCIL: Determine next steps in the process to purchase the proposed Rescue/Engine.

PROPOSAL DETAILS/ANALYSIS: The Public Safety Committee reviewed the specifications as presented from the Truck Committee. Following much discussion, the Public Safety Committee, while supporting the work done by the Truck Committee feels it appropriate to discuss with and get direction from the City Council due to the significant costs of the vehicle and additional equipment.

OPTIONS:

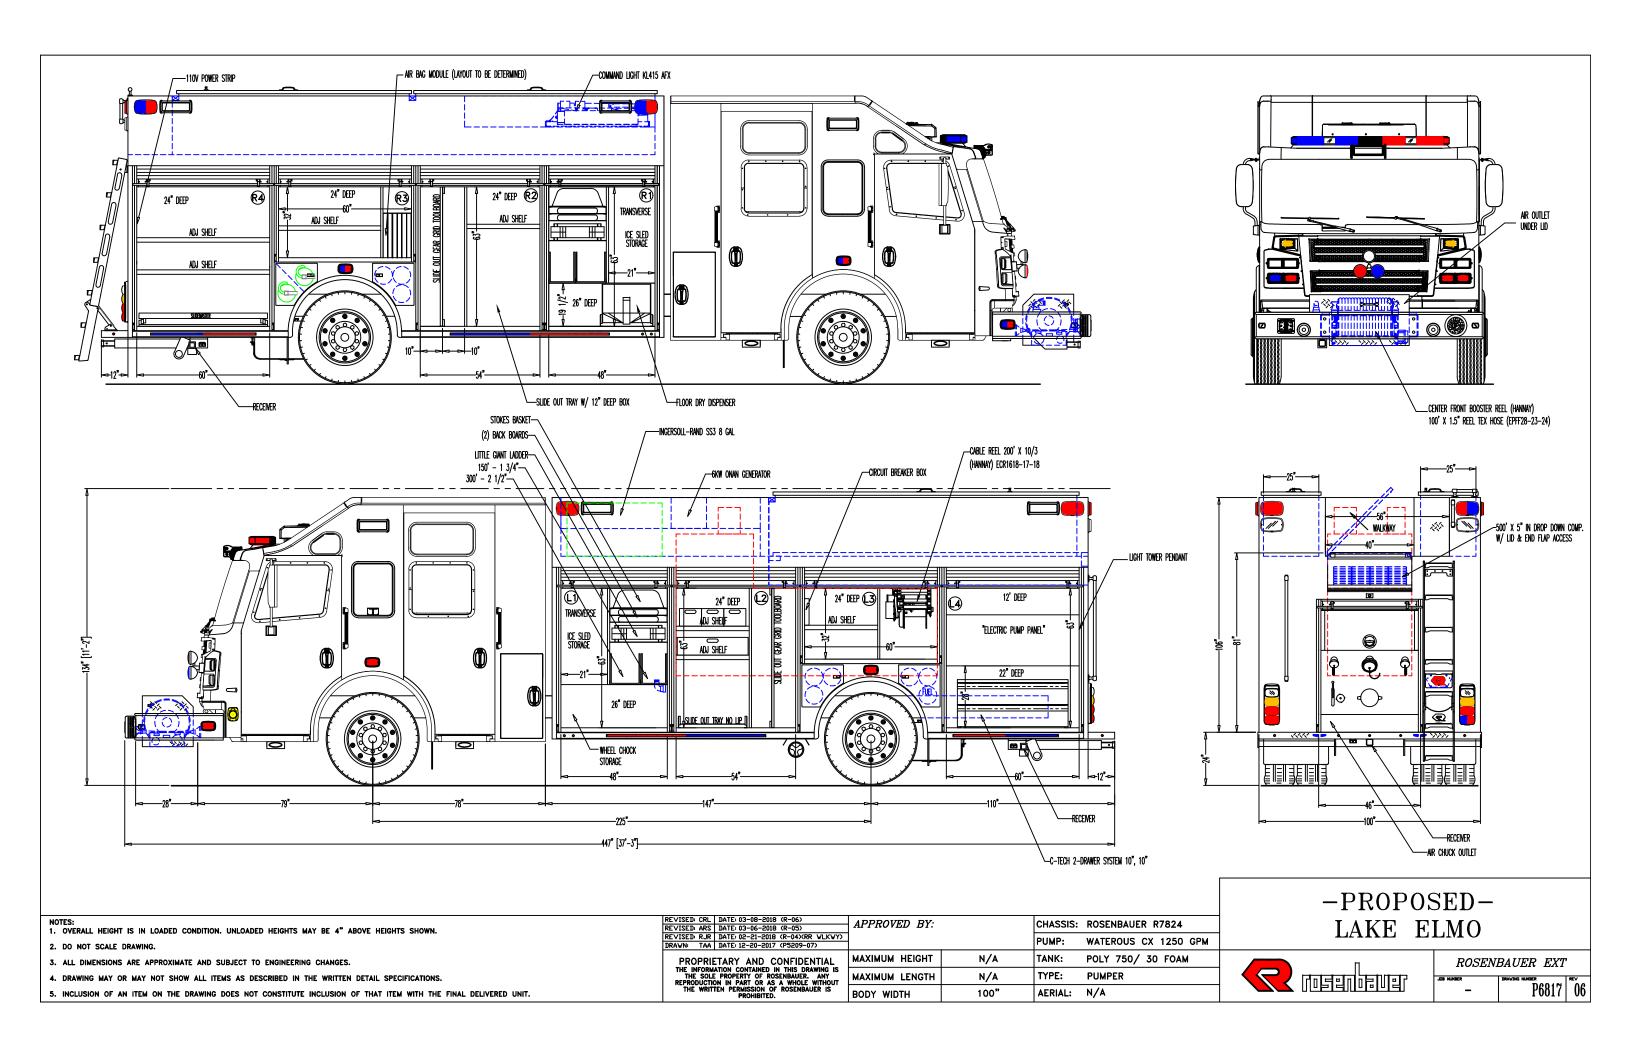

- 1) Move forward with purchase of Rescue/Engine and equipment based on the recommendation of the Truck Committee and review of the Public Safety Committee.
- 2) Send back to Public Safety Committee with direction.

RECOMMENDATION:

Discuss with Public Safety Committee at Council Workshop to get clear direction

ATTACHMENTS:

- 1. Truck Drawing
- 2. Truck Body Specifications
- 3. Truck Chassis Specifications
- 4. Rescue/Engine Vehicle Cost Breakdown
- 5. Rescue/Engine Equipment Cost Breakdown

	With Cargo Webbing		
	There shall be a full interior cab height and full interior cab		
	width power ventilated gear storage cabinet installed on the back wall of the cab interior. The cabinet will be split on the		
	rear wall by two door roll up door openings but one large		
	common compartment, The larger opening shall be on the on		
	the passenger side with a minimum opening 62" wide. The sill		
	between the two doors will be as narrow as possible with		
	remaining space on the passenger side provided with another		
	roll up door to fill the remaining space. The cabinet interior will		
	NOT be split in two. It will have two natural finish roll up doors		
	but will be open inside the compartment the full cab interior		
	width. The compartment will be as deep as possible rearward		
	of the rear crew door openings approx. 20" deep.		
	On the inside of the compartment there will four (4) heavy duty		
	1" diameter hanger pegs approx. 18" long that will be firmly		
	reinforced and attached to the back wall of the cab to act as		
	hangers for wet suits and PFD's in the compartment hung on		
	these hanger pegs. Exact mounting locations / spacing of the		
	hanger pegs to be determined by the fire department at pre		
	construction and locations approved by the manufacturer.		
	One pair of vertical LED OSS strip lights for each door		
	opening. (Total of four (4) vertical light strips.)		
	opening. (Total of four (1) voludaring it outpo.)		
	Roll up doors and interior compt lights to be installed by RMN		
	and frame and interior color to be done by RBM per Mike		
	Gaustad, Dan Van Alten, Mike Schoenberger, Joe Lichtscheidl.

RESCUE/ENGINE VEHICLE COST BREAKDOWN

2018 CIP - \$625,000 placeholder that was arrived at early in 2017 by contacting a vendor and inquiring the "typical" cost of a rescue/engine. The range given was \$600,000 - \$650,000, at that time and the \$625,000 middle of the road was proposed. At that time we had no idea of what the final product would be with our goal to be combining 2 vehicles.

Proposed cost, based on current specifications is \$684,302. The Truck Committee went back to the vendor to determine what the contributing factors were for the increase over the typical rescue/engine of a year ago. Some of the items not considered in the typical rescue/engine from 2017 are as follows:

- \$5K Light Tower, Provides scene lighting from an elevated position for safer operations for all Responders at night. Committee recommended LED lights for brighter more efficient, longer lasting lighting.
- \$7.8k -Improved scene lighting at and around the truck. As with the Light Tower, Committee recommended additional lighting improved to LED.
- \$11k for larger cab to allow us to combine the operations and equipment of the 2 vehicles, provide a rehab location to get Responders out of the elements and allow rescuers to get into and out of water rescue gear.
- \$6.5k for headset/radio/intercom system to allow crew to communicate with each other and dispatch. This system has been purchased on last 2 vehicles and retrofitted into a previous vehicle as well.
- \$6k reflects chassis cost increase from 1 year ago.
- \$6k for winch system. This is a single vehicle size winch that can be moved to all 4 sides of the truck and used to stabilize vehicles and/or equipment during rescue operations. We currently utilize the winch mounted on the front of a Brush Truck, but are limited by accessibility and personnel.
- \$2.2k for on-board compressor, plumbed into truck to run air tools during rescue operations. We currently utilize breathing air bottles to run tools and this process is very cumbersome in set up and operation. The newer system is quicker, more efficient and requires less personnel when time is critical.
- Additional costs associated with the need for shelving and holders for the rescue equipment.

COST OFFSETS

- \$141k \$566k savings by combining the two vehicles into one. Had we purchased them individually, the price range is as follows: Engine (\$450k \$575k) and Rescue (\$375k \$450k) TOTAL \$825K \$1.25 mm.
- \$10k \$15k, Potential sale of 1990 Engine
- \$5k \$7k, Potential sale of 1994 Utility Truck
- \$2k due to smaller generator because of efficient LED lighting.
- \$5k discount for allowing Rosenbauer to show the truck at the FDIC.
- \$? Potential trade in or sale of used extrication equipment.
- Reduction in maintenance costs. Combined 5 yr. maintenance costs for 2 current vehicles, \$29,436.56 and "Out of Service" – 119 days.
- Received donated, used radio equipment from Washington County and Bayport PD.

PAYMENT SCHEDULE

Chassis and body are paid for separately. If truck is ordered in the next month, first payment of approximately \$258,632 would be due in Oct./Nov. of 2018. Balance of approximately \$425,670 (\$5,000 discount for FDIC) would be due upon delivery in 2019.

Public Safety Committee had some follow up questions regarding potential savings.

What is the cost savings by going all red vs red/black? \$1,260

Any additional discounts for shows or as demo? None at this time.

RESCUE/ENGINE EQUIPMENT COST BREAKDOWN
