## **INTRODUCTION**

### **What is a CIP?**

A Capital Improvement Program, or CIP, is a multi-year (5 – 10 years) capital expenditure plan for a city's infrastructure (such as streets, parks and utility systems), vehicles, equipment, and public buildings. It identifies the major projects needed and desired by the community, their potential costs and how they would be financed. Including a project in a CIP does not commit the city to that project. The City Council must specifically authorize each one, and the associated funding, before any project may proceed. When the CIP is reviewed (ideally annually, in conjunction with the budgeting process), projects may go forward as planned, advance ahead of schedule, be removed entirely, or new projects may be added, depending upon changes in circumstances and priorities.

The Minnesota Land Planning Act requires that the implementation plan portion of the Comprehensive Plan include a CIP for major infrastructure needs (transportation, wastewater, water supply, parks and open space) for a five-year time period. Cities often expand the scope of their CIPs to include other capital needs (major equipment replacements, for example) and sometimes look beyond the five-year time period, up to 20 years in the future for some projects. Such projects represent more of a "wish-list" that can be evaluated each time the plan is updated.

As a part of the Comprehensive Plan, the CIP has some legal standing. Minnesota Statutes Chapter 473.865 provides that "a local governmental unit shall not adopt any official control or fiscal device which is in conflict with its comprehensive plan." A fiscal device includes a budget or bond issue; so it is important that the plan and CIP be kept-up-to date and in sync with city budgets.

The primary benefit of a CIP is as a financial planning tool to help the city plan for the impact of capital needs on future budgets and property taxes, and to help forecast the need for borrowing to undertake major projects. The information developed as part of the capital planning process can help document the need for various projects and assist the City Council to sort out competing priorities.

### **Scope of the CIP**

Lake Elmo's CIP includes all capital projects that cost at least \$25,000 and have a useful life span of five years or longer. Projects include all capital needs including major repairs to buildings and equipment purchases and replacements. Any projects not meeting these parameters would be reviewed as part of the annual operating budget, but would not be included in the CIP.

## Funding Sources

The CIP identifies a possible funding source(s) for each project listed. The various funding sources are as follows:

<b>Debt Service Fund</b>	Projects financed by borrowing, later to be repaid with property taxes, and potentially special assessments depending upon the characteristics of the project.
<b>General Fund</b>	Annual operating budget, primarily funded by property tax revenues.
<b>Park Improvement Fund</b>	Existing City fund, receipts from cash-in-lieu of land park dedication fees paid by developers and others who subdivide their land.
<b>Stormwater Fund</b>	Funds come from fees paid by users of the Stormwater system.
<b>Wastewater (Sewer) Fund</b>	Funds come from fees paid by users of the Wastewater (Sewer) System.
<b>Vehicle Fund</b>	Fund used to segregate funds set aside for planned vehicle replacements and new acquisitions. Funds are transferred from the operating budget (primarily property taxes) and the sale of equipment.
<b>Water Fund</b>	Funds come from fees paid by users of the Water System.
<b>Municipal State Aid (MSA)</b>	State aid funds allocated to the City each year; annual allocation grows as the City grows.

In addition to these sources, it is possible that future projects could be funded from donations, grants, user fees or other sources not listed.

## Project Priorities

Capital improvement projects should be prioritized in some way so that limited funding can be allocated to those which are most important. This is difficult because the varying nature of the projects and their benefits and objectives are so disparate as to be essentially not comparable. Some public agencies have developed elaborate rating and ranking systems to try to set priorities. Complicated scoring systems may have some disadvantages because they may give a false sense of objectivity or precision to the priority setting process. Others use simpler systems, or simply do not try to compare projects that are like “apples and oranges.” There is no accepted system or “industry standard” for prioritizing projects.

The following system has been utilized by staff:

- 1 Critical or urgent, high-priority projects that should be done if at all possible; a special effort should be made to find sufficient funding for all of the projects in this group.
- 2 Very important, high-priority projects that should be done as funding becomes available.
- 3 Important and worthwhile projects to be considered if funding is available; may be deferred to a subsequent year.
- 4 Less important, low-priority projects; desirable but not essential.
- 5 Future Consideration

## **2024-2033 CIP**

### **Overview**

Starting this year, the City of Lake Elmo is moving to a 10-year CIP. For 2024 through 2033, the draft CIP includes 130 projects (active, pending and new recommendations) with a total estimated cost of \$104,831,468. (Street & Utility Improvements are separated into street and water components.) All cost estimates are preliminary and based on current dollars. No assumptions have been made about inflation. It will be important to refine and update costs when the plan is reviewed, especially for projects in the first year or two of the plan.

Some projects beyond the ten-year planning period may also be included in the CIP. Most of these projects are replacements for equipment and vehicles (such as fire trucks) which may have a life span of 10, 15 or 20 years and more. The plan may include “pending” projects for which timelines (and in most cases, cost estimates) have not yet been identified. As more information is developed about the need for, cost, and possible funding sources for these projects, they will be included in future CIP updates.

### **Street Projects**

At the July 11, 2023 City Council Workshop, City Engineer Jack Griffin presented an updated Pavement Management Plan. Attached for reference are the resulting 10-year Street CIP Map and Schedule. These projects have also been incorporated into the city’s CIP software Plan-It and are part of the reports below.

### **Vehicle Replacement Fund**

The Vehicle Replacement Fund at 12/31/2022 had a fund balance \$ 1,558,216. The estimated balance at 12/31/2023 is \$ 1,106,877. The updated proposed schedule of revenues and expenditures in the chart below currently aligns partially with the projected contributions from 2023 Long-Term Financial Management Plan, with contributions in the earlier years increased to avoid fund deficits, and later years decreased, such that the total 10-year contributions remain the same. As we continue to build out the 10-year CIP and update the Long-Term Financial Management Plan staff will assess if projected funding levels are still appropriate.

<b><i>Schedule of Revenues and Expenditures</i></b>			
<b>Year</b>	<b>Revenue</b>	<b>Expense</b>	<b>Fund Balance</b>
2024	\$300,000	\$845,320	\$561,557
2025	\$300,000	\$185,147	\$676,410
2026	\$400,000	\$205,000	\$871,410
2027	\$300,000	\$1,140,000	\$31,410
2028	\$475,000	\$35,000	\$471,410
2029	\$750,000	\$408,764	\$812,646
2030	\$900,000	\$0	\$1,712,646
2031	\$900,000	\$111,744	\$2,500,902
2032	\$800,000	\$0	\$3,300,902
2033	\$680,000	\$0	\$3,980,902
<b>Total</b>	<b>\$5,805,000</b>	<b>\$2,930,975</b>	<b>\$3,980,902</b>

Revenue from investments and the sale of equipment is not included in the above table.

## **CIP Reports**

The following reports and attachments – available for quick access via PDF links –provide information on specific items budgeted by department and by funding source.

1. **Project Listing** – Provides a simple list of projects with project name and number, listed by department.
2. **Projects by Year for each Department** – Lists projects for each year with project number and cost.
  - a. Projects by Year – Building
  - b. Projects by Year – Fire
  - c. Projects by Year – Public Works – Vehicles
  - d. Projects by Year – Public Works – Streets
  - e. Projects by Year – Parks & Recreation
  - f. Projects by Year – Water
  - g. Projects by Year – Sewer
  - h. Projects by Year – Stormwater
3. **Projects by Year & Priority** – Sorts the projects by year and designated priority assigned to them.
4. **Funding Source Summary** – Illustrates amount of funding needed from each source for projects within that year.
5. **Projects by Funding Source** – Shows the distinct projects within each funding source and the year they are proposed.
6. **Projects and Funding Source by Department** – Shows the projects within the departments, along with a funding source total for each year.
7. **Project Detail** – Comprehensive list of all projects in the CIP, including description, funding source, priority, etc.
8. **Street CIP Map & Schedule** – excerpt from the City Engineer’s Pavement Management Plan.

### Priority 1 Critical

Turnout Gear Replacements	Fire Department	F-017		110,000
			<i>Total for: Priority 1</i>	110,000

### Priority 3 Important

2032 Street Improvements	Public Works Department	PW-080		3,729,000
			<i>Total for: Priority 3</i>	3,729,000

### Priority 4 Less Important

2032 Street & Utility Improvements - Water portion	Water Department	W-051		210,000
			<i>Total for: Priority 4</i>	210,000

### Priority 5 Future Consideration

Hidden Knoll Park Play Equipment - Replacement	Parks and Recreation	PR-034		125,000
Tapestry Sanitary Sewer Collection System Upgrades	Sewer Department	S-027		1,000,000
Future Unidentified Stormwater Projects	Storm Water Department	SW-TBD		50,000
			<i>Total for: Priority 5</i>	1,175,000
<b>Total for 2032</b>				<b>5,224,000</b>

## 2033

### Priority 2 Very Important

Paint/Rehab Water Tower 4 (Inwood Ave)	Water Department	W-044		800,000
			<i>Total for: Priority 2</i>	800,000

Project Name	Department	Project #	Priority	Project Cost
<b>Priority 3 Important</b>				
Manning Ave Phase 3	Public Works Department	PW-057		0
<i>Total for: Priority 3</i>				0
<b>Priority 4 Less Important</b>				
CSAH 6/Inwood Signal	Public Works Department	PW-031		300,000
2033 Street and Utility Improvements	Public Works Department	PW-084		892,500
2033 Street & Utility Improvements - Water portion	Water Department	W-052		525,000
<i>Total for: Priority 4</i>				1,717,500
<b>Priority 5 Future Consideration</b>				
Reid Park Play Equipment - Replacement	Parks and Recreation	PR-031		125,000
Future Unidentified Stormwater Projects	Storm Water Department	SW-TBD		50,000
<i>Total for: Priority 5</i>				175,000
<b>Total for 2033</b>				<b>2,692,500</b>
<b>GRAND TOTAL</b>				<b>104,831,468</b>

Description

Total Cost

\$147,320

Status

Active

Replacement of B 2 (2004 F350 brush Truck) with a 1/2 ton, crew cab pickup including all necessary response equipment, lighting and graphics.

Justification

The fire department replaces vehicles on a rotating basis based on each individual vehicles need. The utility vehicle will be utilized by all Fire Department staff to respond to emergency incidents 24 hours a day 365 days per year to provide crew response, firefighter safety, support on emergency incidents, fire inspection and prevention efforts. Provides an additional vehicle that can be used for towing and hauling. Open pickup bed will allow for the safe hauling of dirty and decontaminated fire house and gear following incidents.

Maintenance

Useful Life

10 years

Category

Equipment: Fire Equip

Description

Total Cost \$110,000

Status New Recommendation

Replacement of 25 sets of turnout gear (Jacket, Pants, Particulate Hood and Boots).

Justification

The majority of our current inventory of structural firefighting turnout gear will be 10 years old in 2022 and 2 NFPA cycles behind current standards. Per NFPA 1971, turnout gear is required to be retired and taken out of service after 10 years. The requested sets of turnout gear, additional hoods and boots include the enhanced safety features available through the 2018 NFPA 1971 standard. New safety features include, less water absorption by the turnout gear outer shell, a particle protection barrier on hoods, and better ergonomic design of turnout gear to minimize gaps in protection. The benefit of acquiring this funding will greatly increase the safety of our firefighters during all types of incidents and drills requiring structural firefighting turnout gear.

Replacement of SCBA (Self Contained Breathing Apparatus) Fill Station & Compressor.

Justification

The SCBA (Self Contained Breathing Apparatus) Fill Station & Compressor system has a life expectancy of 20 years. As the unit ages, maintenance and repair costs will continue to increase. These funds will be utilized to replace equipment in a timely manner to reduce maintenance costs and down time.

Equipment: Fire Equip

Description

Total Cost\$30,000

StatusNew Recommendation

Refurbish existing hose storage areas and pump piping to include preconnected hose capabilities and refurbish tool and equipment areas to better utilize available storage space.

Justification

The fire department replaces or refurbishes vehicles on a rotating basis based on each individual vehicles need. As department operations are being reevaluated with the new single station operating model, all department apparatus will be used more frequently for its intended use. This project will allow for better apparatus utilization and response capability. The Rescue 1 refurbishment will provide a refurbish of existing hose storage areas and pump piping to include preconnected hose capabilities and refurbish tool and equipment areas to better utilize available storage space. Rescue 1 is utilized by all Fire Department staff to respond to emergency incidents 24 hours a day 365 days per year to provide crew response, firefighter safety, support on emergency incidents, and prevention efforts.

Project NameEquipment Decon Cleaning System

Department

Fire Department

Contact

Fire Chief

Type

Equipment

Useful Life

20 years

Category

Equipment: Fire Equip

Description

Total Cost\$40,000

StatusNew Recommendation

Equipment decon cleaning system cleans all protective gear and steel, composite, rubber, fabric, plastic equipment in a mechanical, self-contained process. This equipment is permanently installed in the decon room of the fire station. This system offers a quick, easy and safe method of cleaning protective gear in a sealed compartment. This ergonomic process minimizes manual contact with contaminated materials.

Justification

Exposure to hazardous chemicals and carcinogens is a well known health risk for firefighters. Studies have shown that they run a significantly higher risk of being diagnosed with various forms of cancer than the general population. To reduce this dangerous exposure it is essential to thoroughly, safely and efficiently clean and decontaminate all protective equipment after every use. Cleaning gear with and equipment decon cleaning system, significantly reduces the exposure to cancer causing PAH particles and supports a safer work environment for staff.

Park Improvements

Description

Total Cost\$520,000

StatusActive

Central Greenway Regional Trail beginning at CSAH 19 and I-94, traveling through Lake Elmo Park Reserve, east along Stillwater Blvd to Manning Ave and then north to TH36.

2023 potential segments include in front of Hagbergs and near Keats/CSAH 10 (if a road project is funded).

Justification

Trail would address the following community needs:  
-Deliver students safely to school  
-Bring people to our downtown  
-Bring people to our parks  
-Provide safe recreation  
-Trail Diversity-Provide feel of Lake Elmo  
-Omit need to bike down Hwy 5/CSAH 14  
-Compatibility with public grant opportunities  
-Compatibility with private funding opportunities  
  
Feasibility of land acquisition will be a consideration  
  
Trail likely to be built in segments in conjunction with county road projects and as funding allows through Met Council or other state grants

Expenditures	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	Total
Construction/Maintenance					520,000						520,000
Total					520,000						520,000

Funding Sources	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	Total
Park Dedication Fund					520,000						520,000
Total					520,000						520,000

Budget Impact/Other

Additional trails to maintain-labor and materials for snow removal if desired by city

Trail construction cost may be as high as \$12 million. City would expect cost share with county as well as grants to offset costs.

City of Lake Elmo, Minnesota

2023 costs are for trail through new roundabout at CSAH 19 and CSAH 10 and trail extension abutting Hagebergs

Future costs will be added as they are known

City of Lake Elmo, Minnesota

Project #	PW-035
Project Name	UP RR Crossing - Village Parkway and Private Drive

Department	Public Works Department
Contact	Engineer
Type	Improvement
Useful Life	40 years
Category	Street Construction

Description	Total Cost	\$982,000	Status	Active
Construction of the street, trail and sidewalk segment of Village Parkway that crosses the Union Pacific Railroad (UPRR) and railroad right-of-way, including trunk watermain extension across the railroad right-of-way with pressure reduction valve (to be installed with development), and closure of the adjacent private railroad crossing. To obtain permitting and approvals, the project includes potential upgrades to the UPRR crossing at Klondike Avenue.				
Justification	Village Parkway crossing is need to connect the developing Village neighborhoods north and south of the tracks, including pedestrian connectivity for a walkable downtown area. The Private closure (DOT 183913SD) and potential improvements to Klondike Avenue (DOT 183811D) are requirements of the Railroad for obtaining the new improved crossing location.			

Expenditures	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	Total

Street Reconstruction

Description

Total Cost \$4,878,000

Status Active

Reconstruction of gap segments along Hudson Boulevard to improve the roadway to the adopted Hudson Boulevard design standards with pedestrain trail. Gap segemetns are portions of the roadway not being improved as part of ongoing or upcoming development proejects.

2023 Segment (from east side of Springs Apartments to Lakewood Crossing).

2024 Segment (from east side of Applewood Pointe to 9242 Hudson Blvd).

2025 Segment (Vahli-Hi to Bus Facility).

Justification

Pavement section nearing or beyond useful life. Improvements have been deferred to extent possible to allow for development paid upgrades along some segments. Gap segments to be addressed to create completed project and complete trail connections.

CategoryVehicles

Description

Total Cost\$300,000

StatusActive

Used VAC Truck

Justification

As the City’s water, sewer and storm sewer systems continue to expand at a fast rate we are seeing more and more of a need to maintain the utilities in a time sensitive manner. The addition of a VAC truck would benefit the city by improving the response time to sewer backups. It would allow more frequent cleaning of lift stations, reducing plugged pumps. We would Jet the required 1/3 of the cities sanitary mains as it fits our schedule. Currently we are not meeting the 1/3 rule due to the cost of contracting out the jetting. Water main gate valve boxes can be cleaned when full of sediment quickly to allow staff access to control valves to isolate main breaks. Plugged storm sewers and culverts can be cleaned quickly the same day issues are identified. The MPCA mandates we clean storm water sumps yearly. This piece of equipment would allow us to do the work in-house on our schedule instead of contracting it out. The Vac truck can safely and efficiently expose power, gas and communication lines. It reduces labor when excavating around curb stops, gate valves. This piece of equipment would replace the small VAC trailer unit we have now that cannot perform the majority of task provided above.

Description

Total Cost \$1,050,000

Status Active

Met Council Gravity Sewer Extension: A regional gravity sewer extended along the north side of I-94 from the current MCES 1-WO-500 (aka WONE) connection point in Oakdale east toward the Lake Elmo corporate boundary. The project includes pump upgrades to the City I-94 lift station that discharges through a City-owned forcemain to the MCES gravity sewer connection point. The Met Council will upgrade the gravity line further east toward the Lake Elmo City limits, providing a shorter forcemain route for the lift station by roughly 3,000 feet. Cost estimates and scope of improvements to be further evaluated and revised when Met Council complete their upgrades in 2024.

Justification

Upgrades to lift station and foremain in order to provide for continued growth in the southwest area of the city

Project Name50th Street & Hill Trail Low Pressure Sewer System

DepartmentSewer Department

ContactEngineer

TypeImprovement

Useful Life40 years

CategoryWastewater

Description

Total Cost\$1,636,000

StatusNew Recommendation

The city may consider the extension of a low pressure sewer system along 50th Street and Hill Trail in connection with proposed street improvements. Comprehensive Amendment would be required. Area is a peninsula with high ground water making the ongong use of septic systems unsustainable.

Justification

"Not located within the MUSA. Comprehensive Plan Amendment would require septic system study to determine extent of failing systems and potential alternatives and to justify need. However, area is nearby an existing sewer connection point at the intersection of 50th Street and Ideal Avenue. Sewer discharge is to Oakdale sewer system and would require amendment to sewer use agreement with Oakdale. Many lake lots-connecting to city sewer could improve water quality."

Project NameTapestry Sanitary Sewer Collection System Upgrades

DepartmentSewer Department

ContactEngineer

TypeImprovement

Useful Life40 years

CategoryWastewater

Description

Total Cost\$1,000,000

StatusNew Recommendation

The city may consider assuming ownership and maintenance of the sewer collection system within the public right-of-way of the Tapestry subdivision in connection with improvements to the public streets. The neighborhood is connected to city sewer through a lift station and forcemain connection but the HOA continues to own the sanitary collection system within the public right-of-way. A sewer televising/inspection program would be required and all necessary repairs and upgrades would need to be completed with the street project before the city accepted ownership.

Justification

The City assumed ownership of the neighboring subdivision (Hamlet on Sunfish Lake) sewer system when the development connected to city sewer.

Description

Identify and pursue opportuiniities to design and install a stormwater reuse irrigation systems within the City.  
Design and install stormwater reuse irrigation systems wih the new City ballfields (once location determined).  
Work with HOAs to convert irrigation systems to full/partial stormwater reuse (e.g. Wildflower, Legacy at Northstar).

Justification

Pursue opportunities to implement stornwater reuse irrigation systems to promote water conservation and mnimize withdrawl of water from the underlying aquifers.

Decommissioning and removal of water tower #1 on Langly Court.

Justification

Once water tower 3 is constructed in the low poessure area, water tower 1 shuld be decommissioned. If not decommissioned, it will need significant maintenance to upkeep. Location (monopole?) needed to relocate cell antennas
