City of Lake Elmo is Hiring!

The City is currently accepting applications for the following positions:

- Code Enforcement Officer
- Community Development Director
- Public Works Seasonal Workers

Additional information and employment applications are available on the City's website: [Employment](#)

Summary of programs conducted in the City of Lake Elmo in 2022:

Support for MS4 Stormwater education Volunteer engagement

Adopt a Drain: 53 drains adopted in Lake Elmo. 165.3 pounds of debris collected by volunteers. 6.4 volunteer hours.

Certified Water Steward volunteers in Lake Elmo: John Hodler, Deb Wall.

- John Hodler previously converted about ½ acre of turf to prairie at his Lake Elmo home. He has since moved to Stillwater so the property is in new ownership.
- Deb Wall also converted a portion of her yard to prairie and continues to care for that planting project.

○ May 21 – helped to recruit volunteers for a planting project at Lake Elmo Park Reserve with Pollinator Friendly Alliance and Washington County Parks.

Other education activities in Lake Elmo

- Developed narratives for case studies in the Washington County irrigation reuse [StoryMap](#) and shared the story map with EMWREP partners and Washington County cities
- April 23 (Earth Day weekend) - Attended Earth Day clean-up event at Sally Manzara Nature Center in Lake Elmo
- July 20 - Sally Manzara Nature Center: Water Play Summer Day Camp (Lake Elmo). Angie Hong led a hands-on learning activity
- Twelve site visits with landowners in Lake Elmo for conservation projects

Media

○ [Is it safe to eat the fish?](#) Feb. 10, 2022

“The short answer is, it depends.”

○ [Plant-a-palooza coming up!](#) May 19, 2022

“The next few weeks will offer numerous opportunities to enjoy all things plant-related, including two volunteer planting events, a bison release, two native plant sales, and two family nature events.”

○ [Local lakes at risk of too much love](#)– Aug. 25, 2022

“As shorelines become increasingly more developed, we start to see shoreline erosion, fewer fish and wildlife, more algae in the water, and diminished water clarity.”

○ [New technology coming from Australia to fight PFAS “forever foam”](#) - Nov. 12, 2022

“Funds from the \$850 million settlement between 3M and the State of Minnesota will be used to purchase, import, and operate the two systems.”

Utility Billing - Stormwater Fee

City utility bills include charges for water usage, sanitary sewer, storm water management and state water testing. These city services are not supported by property taxes. The amount paid through your utility bill covers the cost of providing these services, improvements to the systems, and general system repairs and maintenance. The revenue received from your stormwater utility fee is used for preparation of a Surface Water Management Plan, maintenance of existing ditches, culverts, ponds and storm sewers, capital improvements in developed areas, equipment, planning, inventories and water quality improvements including weed control.

Get involved!

The City of Lake Elmo is seeking interested residents to serve on the Planning Commission. The Planning Commission meets 1-2 times per month to review and hold public hearings for development applications, variances and other planning related items. No experience is necessary! Application and more information is available on the City's website: [click here](#), or contact City Administrator Kristina Handt for more information: khandt@lakeelmo.org.

Winter Parking

Please remember that the City of Lake Elmo has a winter parking ordinance that **prohibits parking on city streets from November 1st through March 31st between 2:00 a.m. and 7:00 a.m.** This gives crews a window of time for clearing streets curb to curb more efficiently. Thank you for your understanding and cooperation!

Report Streetlight Outage

Xcel Energy maintains streetlights on public streets in Lake Elmo. If you notice a streetlight that is burned out or malfunctioning, please use the link below to report the issue. It's helpful to note the location with nearest cross streets and the pole number if you are on foot and able to make note of it.

MPCA Utilizing New Technology to Clean Water in Lake Elmo

Minnesota Pollution Control Agency has placed equipment at Tablyn Park that utilizes a new

technology to remove contamination from groundwater. Click below to view a KSTP news story featuring an interview with Councilmember Jeff Holtz.

MPCA brings cutting-edge technology to Minnesota to remove PFAS from water

Minnesota is the first state government in U.S. to use this combination of innovative technologies to address "forever chemicals"

(St. Paul, MN) – The Minnesota Pollution Control Agency (MPCA) today announced the purchase of new state-of-the-art emerging technology to remove and destroy bulk concentrations of per- and polyfluoroalkyl substances (PFAS) from contaminated water in the environment. This fall, the state will deploy the technology in the East Metro as part of the ongoing work to address PFAS contamination affecting the drinking water for roughly 174,000 residents. The system is paid for with funds from the 3M settlement.

The process works in two parts. The first technology, surface activated foam fractionation (SAFF), injects outdoor air into contaminated water, turning PFAS into foam that can be separated from the water. The foam is then removed, PFAS levels are significantly reduced, and the water is returned to the environment — both cleaner and safer. The PFAS concentrate then goes to the DEFLUORO unit, a second technology where the carbon-fluorine bonds (the backbone of PFAS chemicals) are broken through electrochemical oxidation. Both technologies are mobile and work without adding any chemicals back into the surface or groundwater.

"This pilot project marks the beginning of a new era for PFAS clean-up in Minnesota," said MPCA Commissioner Katrina Kessler. "This study will help us address PFAS contamination at the source and develop long-term solutions for cleaner water — ensuring safe drinking water for Minnesotans. We hope to eventually employ this technology around the state including in Greater Minnesota, where PFAS is a growing concern."

With fewer than 20 systems in existence, the SAFF technology is in high demand across the globe for its innovative ability to separate PFAS from water safely and quickly. Minnesota is the first state government in the country to purchase and implement it. The SAFF unit will deploy at Tablyn Park in Lake Elmo for the first round of testing on groundwater and surface water. It will likely move to other testing locations over the next one to two years. The DEFLUORO unit will be staged at the former Washington County landfill location.

Australian-based OPEC Systems, Ltd. designed the SAFF technology. U.S.-based AECOM designed the DEFLUORO unit. The SAFF unit is in route to Minnesota from Australia and is scheduled to arrive next month.

State agencies are working with city and county representatives to ensure safe handling practices under applicable regulations. None of the water used in this temporary test is connected to the city's drinking water, which remains safe and well within Minnesota Department of Health (MDH) drinking water guidelines for PFAS impacts.

The City of Lake Elmo is on Nextdoor!

In an effort to reach as much of the community as possible we've joined Nextdoor. We will use our public agency page to post news and important updates for residents.

The Brookfield building at 3880 Laverne Avenue is closed and under construction. All City Services are available at City Hall, 3800 Laverne Avenue

Please drive slowly and watch for construction activity

Running a company of any size can be a challenge. For a small business owner, it can be a lonely one too. Wouldn't it be helpful to have a group of peers where you have a forum for exchange of information, ideas, insights, and perspectives?

That's what our WHAT'S NEXT CEO Roundtable is all about - a place where you can work through your specific business issues with fellow small business owners. This is not a networking event. It is a peer-to-peer group that provides a secure environment for open, confidential discussions about concerns, problems, and opportunities a member may be facing.

Our What's Next CEO Roundtable is a professional business meeting consisting of small business Presidents, Owners, and CEOs from Washington County. The group will consist of 10 to 12 members from non-competing companies.

The purpose of the group is to provide a gathering for the exchange of information, ideas, insights, and perspectives. All meetings are completely

confidential which provides a secure environment for open discussions about concerns, problems, and opportunities a member may be facing. On occasion, guest speakers will present ideas and solutions to roundtable members.

The value of joining and attending our monthly CEO Roundtable is to learn from peer-to-peer experiences through a facilitated roundtable conversation. You benefit by learning from each other's achievements and mistakes.

Lake Elmo Library

3537 Lake Elmo Avenue N
Lake Elmo MN 55042
651-275-8515
WashCoLib.org

Hours:

Monday: 10 a.m. - 4 p.m.
Tues., Wed., Thurs.: 12-8 p.m.
Friday: 10 a.m. - 4 p.m.
Saturday: 10 a.m. - 2 p.m.

Public Facilities Project Update

Trim was installed around the new windows on the south side of the building, giving it a sleek look. In the spring this part of the building will get a fresh coat of paint to match the new additions.

This is the future community room that will be available for community organizations to reserve for meetings.

CITY OF LAKE ELMO COMBINED CITY HALL & PUBLIC SAFETY FACILITY

The new Lake Elmo City Hall / Public Safety Facility combines City Hall staff and functions, the entire Fire Department, and a satellite office for the Washington County Sheriff's department. This co-location involves renovating and expanding the City-owned Brookfield Office building to concentrate civic resources into a single structure at the historic core of the city. In addition, the Public Works facility will also be expanded to accommodate City growth and expanded service needs.

TOTAL ANTICIPATED PROJECT COST: \$14,600,000
DESIGN COMPLETION: Late summer 2021
CONSTRUCTION COMPLETION: Fall of 2022

City of Lake Elmo | 3800 Laverne Avenue North, Lake Elmo, MN 55042
