

Lake Elmo offers residents a wonderful selection of park opportunities. Ranging from convenient neighborhood parks to scenic natural areas, the city works hard to offer a broad range of opportunities. As the city moves into the future, we are seeking ideas for activities to build into new parks.

Currently, we are exploring options for developing several acres that will be handed over to the city when the Minnesota Pollution Control Agency (PCA) completes its cleanup on the West Side of Sunfish Lake Park.

This new park space will largely be in a depression next to the mound that encloses the waste that has been seeping into the watershed. The PCA will plant it with a special prairie seed mix. We will not be allowed to add significant structures (including play apparatus) in this park area.

(Include a simple map of the park and closed areas of the park.)

Please take a moment to answer a few questions and offer us your comments.

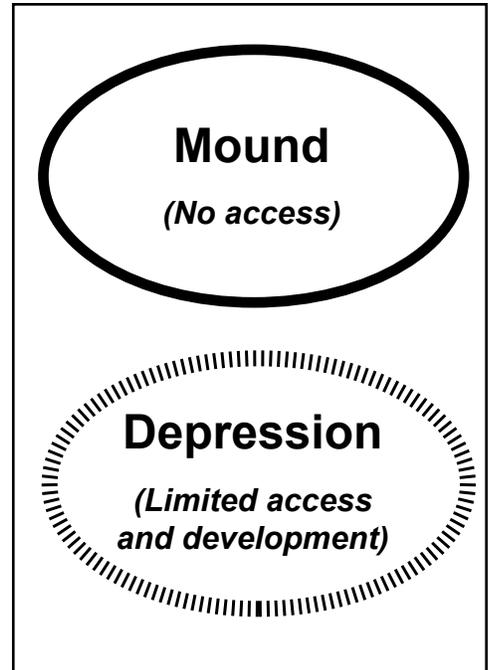

(Options - survey in print, online, or in both formats.)

Questions

- Special uses:
 - Bird watching station
 - Disc Golf (summer)
 - Dog park (summer)
 - Prairie (similar to the South parking area)
 - Sledding hill (winter)
 - Other uses:
 - _____
 - _____
 - _____

- Utilities
 - Bathroom facilities
 - Dark sky friendly lighting
 - Parking (how many slots:
() 1-5; () 6-15; () more than 15
 - Running water
