The proposed solar photovoltaic ("PV") project has a maximum size of 1,000 kilowatts ("KW") alternating current ("AC"). The Project will be constructed on land currently used for agriculture. No wetlands, forests, or biologically sensitive areas will be impacted by the Project. The Project will not produce any adverse impacts on surrounding properties, as it has been designed to avoid perceptible glare and noise, will not generate traffic or emissions once built. Additionally, the Project will not place any new burdens on City infrastructure, as no new water or sewer utilities are required. Conversely, the Project will support healthier air and soils through local renewable energy generation and use of pollinator habitat in site stabilization.

PLANNING COMMISSION DATE: 12/13/2021

ITEM: 2022 Planning Department Work Plan

SUBMITTED BY: Molly Just, Planning Director

SUMMARY AND ACTION REQUESTED:

Staff is respectfully requesting that the Planning Commission review the proposed Planning Department Work Plan for 2022.

REQUEST DETAILS:

The Planning Department Staff has updated the 2021 Planning Work Plan for 2022. Listed below are the activities that have been completed from the 2021 Work Plan:

- Review and make recommendations to the City Council about new Airport Zoning regulations after their approval by the Lake Elmo Airport JAZB, MAC and MnDOT
- Make last of code amendments required for compliance with comp plan
- Planning Commission review of City Capital Improvement Plan for consistency with Comprehensive Plan
- Participate in the planning for and the expected land uses for the City-owned 180 acres of land near County Road 14 and Ideal Avenue
- Determine how new Airport zoning regulations from JAZB, MnDOT and the MAC will be implemented and regulated.
- Migrate City Code from American Legal to Muni Code and codify recent amendments

Some projects are currently in progress or ongoing:

Chief among current projects is rebuilding the Planning Department after staff departures earlier this year. We will also add a new position – Code Enforcement Officer. With all new staff there is an opportunity to refine policies and procedures to make them more transparent and efficient. That will be top of mind with each task or project we undertake.

It is the intent of staff to address the work plan projects in the order that they have been ranked. However, some projects, although ranked lower in terms of priority take less time to accomplish. Because of this other projects with a lower priority will be given attention before or in tandem with others of a higher tank.

REQUESTED ACTION:

Staff is respectfully requesting that the Planning Commission review the proposed Planning Department Work Plan for 2022.
